

## **Cerebral stroke**

### **Manual**

The manual meets the discipline of neurology. It is dedicated to one of the pressing problems of modern medicine- acute stroke.

Peculiarities of brain blood circulation, the structure and functions of brain vessels, the questions of regulation of brain blood circulation and the mechanisms of cerebrovascular disorders are examined in this book.

The manual is aimed for neuropathologists, neurosurgeons, cardiologists, experts in resuscitation, family physicians.
